

GKB Infill Remover

The Infill Remover is the ultimate solution with regards to efficiently removing the infill from your pitch. In its raw form, the Infill Remover is similar to the Combinator. Therefore, you can easily change the working depth with the two spindles in the front of the machine, by means of the patented pendulum system. This patented system will automatically adjust both rollers, which assures an even operating result. When the machine is not operating, the elevator belt is positioned on top of the machine. However, before you start with the operation, you can easily unfold the belt to load the infill on a trailer or in a bag.

Do you want to remove SBR rubber from your artificial sport pitches? Does your pitch fail to meet the sport technical requirements? Or do you want to dispose your artificial pitch separately? The Infill Remover is the ultimate solution, that will allow you to solve those issues.

The Infill Remover works with a unique brush. You have the possibility to adjust the stiffness of the brush. As a result it is possible to work on both new pitches, as well as on heavily compacted pitches. Depending on the characteristics of the pitch, it is possible to remove the entire layer of infill in just one operation.

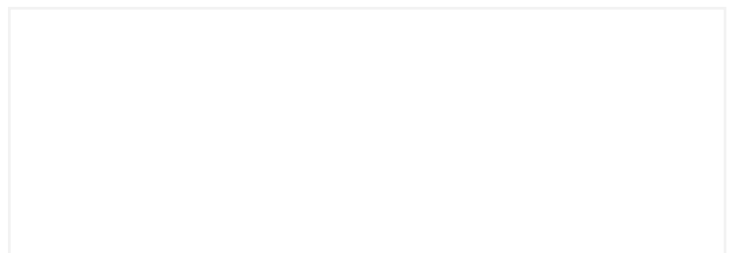

THE WORKER IS KING

Infill Remover

Specifications:

Type	IR120	IR160	IR200	IR240
Working width	120 cm	160 cm	200 cm	240 cm
Working depth	0 -5 cm	0 -5 cm	0 - 5 cm	0 - 5 cm
Dimensions operation (l x w x h)	125 x 290 x 120 cm	160 x 355 x 150 cm	170 x 440 x 160 cm	180 x 520 x 180 cm
Weight	600 kg	900 kg	1100 kg	1400kg
Power requirement	35-45 hp	40-70 hp	65-95 hp	90-110 hp
Linkage	Standard three-point hitch cat II	Standard three-point hitch cat II	Standard three-point hitch cat II	Standard three-point hitch cat II
